

## Looking for **high** switching power with **low** power consumption?

A network **starved** for more **bandwidth**?

Skyrocketing **power bills** giving you **nightmares**?

What you need is a switch with a good backplane, better processing power and the best power consumption statistics in the smallest possible real estate... Look no further than the FastIron Family from Brocade Communications brought to you in India by MRO TEK Limited.

The FastIron series switches are the best of breed Ethernet switches that deliver bandwidth to the tune of 10 Gig to the network edge from the core.

You can take your pick from 7 varied options of switches available in this family; right from a basic 10/100 switch to a high end 16 slot core class chassis. These switches are loaded with all the advanced Layer 2 features, and also are field upgradeable to provide Full Layer 3 functionality for IPv4 and IPv6 dynamic routing.

With most of the processing done in hardware rather than in software, and the huge reservoir of buffers available per port, these little dynamites pack quite a punch for their size!

All this and more for a power consumption that would be almost half of most other switches out there! Implying lower TCO and faster ROI!

### Key Features:

- Flexible and robust features to meet L2 and L3 network requirements.
- An elaborate A-LA-CARTE : Fast Ethernet Switches, Gig switches (With or without PoE, with or without 10 Gig ports, With or without Stacking), Chassis based switches. Varied Software capabilities, Viz. pure L2, Basic L3 and Full L3 (IPv4/IPv6)
- Redundant Power supplies making the system more available and reliable.
- sFlow increases network visibility to every port - More power to the Administrator!
